English exam

Dialysis

What do our kidneys do? The answer is that they clean all the impurities from our blood. Before it enters the kidneys, blood contains a lot of waste products from what we have eaten or drink in the previous day or two. These wastes products are removed in the kidneys and then the clean blood is sent back to the body. This is the normal process in healthy people. Some people, however, either because of an accident or a disease, have damaged kidneys. A few of them are able to have transplants, but for many the only way to purify their blood and to stay alive is a treatment called kidney dialysis.

Dialysis means passing the blood through an artificial filter outside the body. A patient is linked to machine for several hours while this happens. It is not painful but it makes life very difficult for dialysis patients. They have to go to hospital regularly and in between hospital visits they can't travel very far in case they need emergency treatment.

But now, for some patients, there is an alternative to these very expensive and inconvenient kidney machines. It is a kind of portable dialysis machine. Perhaps it's not a very attractive process, but portable dialysis is important development in the treatment of kidney patients. It means that they can visit hospital less frequently and have greater control over their own lives. It also means that more time on kidney machines is available for other patients who are not suitable for portable dialysis.

Section One: Reading comprehension:

Read the text and answer the following questions (6p)

1- Give the main idea of each paragraph.

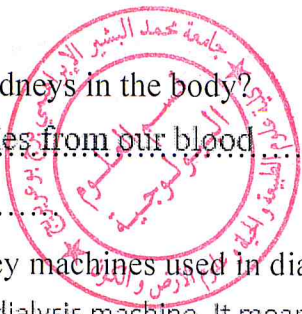

A- .. Normal kidney, role of the kidney

B- .. Dialysis machine

C- .. Portable dialysis|

2- Define the dialysis process:

..... Passing the blood through an artificial filter outside the body

3- What is the physiological role of kidneys in the body?

Is that they clean all the impurities from our blood

4- There is an alternative for the kidney machines used in dialysis, say what is it? And list its advantages: It is a kind of portable dialysis machine. It means that they can visit hospital

Less frequently and have greater control over their own lives. More time on

Kidney machines for other patients.

Section Two:

A/ Find in the text words meaning the same as the following (2p)

Purify = clean many = a lot of

B/ Find in the text words that are opposites in meaning to the following (3p)

Painless ≠ painful To die ≠ alive natural ≠ artificial

Section Three: written expression

Translate the paragraph "B" into French (4p)

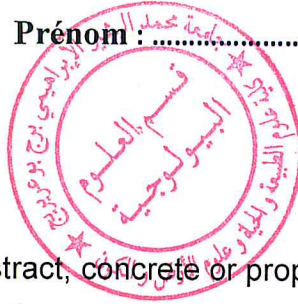

Dialyse signifie le passage du sang à travers un filtre artificiel à l'extérieur corps. Un patient est lié à la machine pendant plusieurs heures pendant que cela se produit. Ce n'est pas douloureux mais cela rend la vie très difficile pour les patients dialysés. Ils doivent aller à l'hôpital régulièrement et entre les deux visites à l'hôpital ils ne peuvent pas voyager très loin au cas où ils auraient besoin d'un traitement d'urgence.

Activity

How turgor is formed? (5p)

The process of photosynthesis leads to an increased concentration of sugar within the cell sap consequently, osmosis occurs and water enters the cell. The increased volume of water within the cell causes an increase of pressure on the cell wall, thus producing turgor in the cell.

Nom: Prénom: G

Question:01 (05p)

Are the underlined words collective, abstract, concrete or proper nouns?

- 1- Always speak the truth ... Abstract
- 2- Smoking is bad habit Abstract
- 3- Honesty ... Abstract is the best policy Abstract
- 4- Wisdom ... Abstract is better than riches ... Abstract
- 5- King Salomon proper was famous his wisdom ... Abstract
- 6- He owns a fleet collective of cars.
- 7- He gave me a bunch ... collective of grapes.

Question : 02 (07p)

Conversation between doctor and patient about fever.

(Temperature, tired, blood pressure, medicines, syrup, check, when you get ill, what's the problem ? thank you, do you have any other questions ?)

- Patient: Good morning
- Doctor: Good morning, what's the problem?
- Patient: I'm having a temperature and tired
- Doctor: Since how long you get ill?
- Patient: Since yesterday
- Doctor: Let me check
- Doctor: You have moderate fever, temperature is not too high
- Your blood pressure is fine.
- Doctor: I'm writing three medicines and syrup
- Doctor: Do you have any other questions?
- Patient: No, doctor. Thank you.

Good Luck
